

BMW M135I FITTING INSTRUCTIONS ON NON-OPF MODELS

Akrapovic exhaust **S-BM/T/15H** with optional Akrapovic Link pipe set **E-BM/SS/6** can be installed on the following non-OPF models.

There are 2 different connections between stock downpipe and link pipe.

If there is a "V-clamp"- schematic below #3, Akrapovic Link pipe E-BM/SS/6 will fit.

On older models there was a different connection between stock downpipe and link-pipe. Instead of the »V-clamp« mentioned above the »overlapping« connection was used- see schematic below. On this vehicles unfortunately Akrapovic link -pipe E-BM/SS/6 will not fit because of different joint.
